CONDITION OF THE EGR COOLER AFTER 10,000 KM WITH THE SGI FILTER

SCHROEDER GREEN INNOVATION

THE RESULTING EFFECT

The vehicle had a KM mileage of 315,000 km at the time of installation of the SGI filter.

After 10,000 km with the SGI filter, our customer notices a perceptible cleaning effect of the EGR valve cooler, which will significantly extend its service life.

Sooting of the radiator cavities has been stopped and the EGR valve cooler has started to clean itself

SCHROEDER GREEN INNOVATION

THE RESULTING EFFECT

The following video also shows the condition of the EGR valve itself after 10,000 km with the SGI filter.

„The EGR valve is very clean!", reports the customer!
