Fuel Savings

SCHROEDER GREEN INNOVATION

SGI-Filter

The innovative
solution for
sustainable driving

Benefits of the

SGI-Filter

Fuel savings

Average reduction in fuel consumption by approx. 10-20 %

Significant reduction in repair costs

in the operating cycle of a vehicle

- When repairing and/or replacing the EGR valve. Protection of the EGR valve against premature contamination
- When cleaning the clogged diesel particle filter. Burn-off not necessary..
- When cleaning and/or replacing the intake and exhaust manifold

Fewer exhaust gases

Reduction of carbon monoxide (CO) by up to 97.7 %. Reduction of CO₂ emissions by approx. 10-20%.

For all vehicles with petrol and diesel engines

The SGI-Filter is retrofitted in the vehicles.

SGI-Filter for cars, motorcycles & vans

SGI-Filter for trucks

Overview of fuel savings:

Vehicle	Annual mileage	Consumption reduction (10% with SGI-Filter)	Annual fuel saving Sprit/ € *
Passenger car (Petrol)	50.000 km	0,9L / 100 km	450 L 801,00 €
LCV/ Sprinter (Diesel)	100.000 km	1L / 100 km	1.000 L 1.680,00 €
Truck, load capacity 44 t (Diesel)	100.000 km	3,2L / 100 km	3.200 L 5.376,00 €

* At the average price in Germany as at January 2025

Improved combustion performance

Increase in torque and engine power

Extends the service life of the motor

Due to the almost complete combustion of the soot particles

Contact

We'd be glad to advise you personally on the cost savings for your fleet and installation in your vehicle.
